

Space idea

moon place is a circle with look out point above the building. It is a glass dome. The main part is made with a very strong metal. In the wall are air tanks. There are bed rooms on the south wall across from there are the water and food place. There are stairs up to the next floor. On the second floor it has a bathroom, the way to the look out point, and the pant room. There are exits only if you need them. There is a hatch to get in and out to the place were moon landings to get to the launch pad which is about two in a half miles.
